First electronic consignment note sent through ZKS

The electronic records procedure continues to make progress. On August 21, 2009, BSB Braubach/Berzelius Metall succeeded in sending a record to Sonderabfallmanagement-Gesellschaft Rheinland-Pfalz (SAM), using their waste management software david.net with the Modawi eANV solution integrated into it.

Hamburg – Since August 18, 2009, the ZKS is open for business. It has replaced the Mini-ZKS intended as an interim solution. On August 21, 2009, BSB Braubach/Berzelius Metall sent the first electronic consignment note through the ZKS to Sonderabfallmanagement-Gesellschaft Rheinland-Pfalz (SAM). The company used its existing waste management software david.net (manufactured by zwei R software) with Modawi integration.

Modawi is the eANV solution (eANV is the Ordinance on Electronic Waste Recovery and Disposal Records) produced by Consist ITU. This software handles the electronic records procedure as required by the Ordinance on Waste Recovery and Disposal Records, and is transparently integrated into existing waste management software. More than 20 software companies and more than 30 clients from waste management have already chosen Modawi.

About Consist ITU Environmental Software GmbH

Consist ITU Environmental Software GmbH is the specialist for IT solutions in waste management for government agencies and companies throughout Europe.

IT designs, along with the development and maintenance of IT solutions, are our core competencies. Over more than 15 years, projects have been successfully implemented at numerous national and international government agencies and companies.

Our set target is to lead our customers to success through competent consulting, consistent with our motto: Pushing IT forward! as a basis for software development in which the result truly corresponds to your requirements.

Our fields of business:

Our spectrum of services includes technical and data processing designs for all areas of waste management, and the related areas of air and water pollution. Particularly systems

- to monitor waste disposal,
 - to create balance sheets for domestic and hazardous waste,
 - to create and maintain permits,
 - to record and describe systems of the waste management industry,
 - to perform plan simulations,
 - to manage system related information across all environmental media,
 - to satisfy record and reporting obligations
- all belong to our focus.
