Modawi Info Day: Virtual world of ZKS inboxes brought to life

The Hamburg software company Consist ITU, a specialist in waste management, has used the Modawi Info Days for years to present new developments on the road to the future of the electronic records procedure and to show practical examples of the successful application of its IT solution Modawi. This time, the highlight was communication between software companies and the Central Waste Coordination Office (ZKS).

Hamburg – At its "Modawi Info Day" event on May 15, 2009 in the Gastwerk Hotel in Hamburg, Consist ITU demonstrated the electronic records procedure using the Central Waste Coordination Office (ZKS-Abfall, or ZKS for short) to about 70 guests from the waste management industry. This was the first time that the communication of software systems with the ZKS could be presented in public in Germany.

The companies implico GmbH, Kisters AG, and TRIAS Informatik GmbH have used Consist ITU software, Modawi, to reach the final milestone for the electronic records procedure, starting communication with the ZKS.

TRIAS Informatik GmbH accessed the inboxes of the waste producer and transporter from its software, and sent a consignment note with the transporter's signature through the ZKS to the disposal company, represented by implico GmbH, for Tönsmeier Dienstleistung GmbH & Co. KG.

Similarly, KISTERS AG also sent a transmission to the ZKS in the role of waste producer. There, the signature of the disposal company was

added using the Länder-eANV (a cost-effective internal portal provided by the German federal states (*Länder*) to enable participation in the electronic records procedure). Finally, the disposal company sent the consignment note via the Länder eANV back to the waste producer. For this live demonstration, the speakers at the Modawi Info Day used the test accesses for the ZKS.

"I see the presentation at our now-traditional Modawi Info Day as a great step forward. It has really made the virtual world of the inboxes tangible and alive for many people for the first time," explains Ute Müller, managing director of Consist ITU Environmental Software GmbH.

Schedule

The next step towards the digitalization of waste management is when the ZKS is taken live, planned for July 1, 2009. As of April 2010, the records procedure for the disposal of hazardous waste must already have been converted to an electronic procedure.

About Modawi

Modawi is a software package offered by Consist ITU handling the electronic records procedure in compliance with the new Ordinance on Waste Recovery and Disposal Records. The solution provides all the functions for the processes of the electronic records procedure. These are used by waste producers, transporters, and disposal companies in their waste management software.

About Consist ITU Environmental Software GmbH

Consist ITU Environmental Software GmbH is the specialist for IT solutions in waste management for government agencies and companies throughout Europe.

IT designs, along with the development and maintenance of IT solutions, are our core competencies. Over more than 15 years, projects have been successfully implemented at numerous national and international government agencies and companies.

Our set target is to lead our customers to success through competent consulting, consistent with our motto: *Pushing IT forward!* as a basis for software development in which the result truly corresponds to your requirements.

Our fields of business:

Our spectrum of services includes technical and data processing designs for all areas of waste management, and the related areas of air and water pollution. Particularly systems

- to monitor waste disposal,
 - to create balance sheets for domestic and hazardous waste,
 - to create and maintain permits,
 - to record and describe systems of the waste management industry,
 - to perform plan simulations,
 - to manage system related information across all environmental media,
 - to satisfy record and reporting obligations
- all belong to our focus.

History

In August of 1995, ITU was founded based on the DP department of ITU Ingenieurgesellschaft technischer Umweltschutz GmbH (Engineering Corporation for Technical Environmental Protection).

In December 2004, ITU became a company of the Consist World Group. Since 2008 ITU bears the name of Consist ITU Environmental Software GmbH.
