New version of the Modawi eANV solution

The new version of Modawi offers optimized register functionality and simpler document assignment. Modawi 3.2 will be delivered to customers and partners in waste management on February 5, 2010. This version also gives Modawi WebSigner additional functionality.

Hamburg – The new version of Modawi will be available starting February 5, 2010. This version completes the register functionality and makes it even more reliable for the user: Documents can only be stored if they contain all the information required by the register. All register excerpts, in all the cover sheet and content variants, are provided exclusively by Modawi. That ensures that the excerpts are always correct.

Of course, to get a better overview of the contents of the register, users can obtain an excerpt from their register even without an official request.

Based on experience with Modawi, which has already been in production for customers for over a year, additional features have been added to simplify the working day, going far beyond the functionality required by law. For example, document assignment is optimized in Modawi so that users can select the right document quickly when there are document duplicates or conflicts due to receipt from external systems.

Upon request by the customer, additional editable fields can be added to Modawi WebSigner, the Web application that performs signature and selective processing of BMU documents right in the browser. The dis-

About Consist ITU Environmental Software GmbH

Consist ITU is the specialist for IT solutions concerning waste management for government authorities and companies throughout Europe.

Our core competencies are IT concepts as well as the development and maintenance of IT solutions. For more than 15 years we have successfully implemented projects for numerous government authorities and private companies, both national and international.

Our experts have excellent engineering knowledge. Our strengths are specialized consulting, both in procedural questions and those concerning IT, and the development of custom-tailored IT solutions for your waste disposal processes.

Mission

We guide our customers to success using competent consulting true to our motto of "Specifications from Specialists". This serves as the basis for software development efforts with results that meet precisely your requirements.

Range of services

Our range of services includes solutions

- For conversion to the paperless Electronic Records Procedure (eANV),
- For integrating qualified electronic signatures, and including
- Waste monitoring and waste management systems throughout the EU.
